

AI governance compliance — Scan Session Org 2a288ff2906e

Organization: Scan Session Org 2a288ff2906e
Reporting period: 2026-05-15T03:28:11.129109+00:00 — 2026-05-15T03:28:13.139954+00:00

1. AI tool usage summary

Tool	Vendor	Events
Microsoft Copilot		1
ChatGPT		1

2. High risk events

When	Tool	Severity	Score
2026-05-15T03:28:13	ChatGPT	high	78.0

3. Possible PII exposure

No PII keyword rule hits linked to AI events in period.

4. Top users (by detection count)

Insufficient user attribution in telemetry.

5. Risk score overview

Average detection score: 66.5 · Events in period: 2 · By severity: {'medium': 1, 'high': 1}

6. Recommendations

- Prioritize review of high and critical severity AI detections with affected users and application owners.
- Few or no ADM-patterned audit events in the sampled window: confirm Intune / Entra audit categories are retained and that directory audit permissions are granted.
- Schedule recurring governance reviews and export this report for your compliance archive.

7. ADM-related activity summary

Sample window: unavailable · Matching events: 0

Generated by ShadowTrace compliance reporting. Rule-based analysis; validate findings in Microsoft 365 / Entra admin centers.
